**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Kerrigan ('183). See Figures 1, 9 and 13, and column 1, lines 46-55. The term "water resistant" is a relative term and does not structurally define over the prior art since any material, including the table cloth of the reference, is water resistant to a degree.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kerrigan ('183). The reference discloses the invention substantially as claimed, namely a table cover with transparent pockets along the edges thereof; see Figures 1, 9 and 13, and column 1, lines 46-55. However, the reference does not disclose the claimed cloth

Art Unit: 1772

material, the claimed attaching means, the use of graphics or the claimed pocket size.

It would have been obvious to one of ordinary skill in the art to use any well known material, such as water repellant nylon ripstop, as the table cover material in the reference depending on the desired structural properties of the cover. Concerning claims 5-8, 14 and 15, the reference discloses that the pockets are affixed to the skirt portion but does not disclose the specific means of affixing; see column 3, lines 11-12.

It would have been obvious to one of ordinary skill in the art to use any well known means of affixing two layers together, such as stitching, in the article of the reference to provide the desired structural integrity to the cover. With respect to claims 9 and 10, it would have been obvious to one of ordinary skill in the art to provide graphics on the article of the reference to impart a desired decorative effect to the article. Regarding claims 11-13, a change in size is generally recognized as being within the level of ordinary skill in the art.

### ***Specification***

5. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: support for claim 10 must be provided in the specification.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Thomas whose telephone number is 571-272-1502. The examiner can normally be reached on 6:30-4:00 M-THUR.
